

Application Development Service

Our Application Development Service covers a wide range of technology that is designed to help businesses improve their systems and processes increasing the quality of service they provide by constructing efficient and tailored applications.

These are some of the applications we develop:

Information Systems

Database management, data mining, information retrieval, internet and cloud data management, and organizational behavior; these are only some of things that we can handle. We do data handling flawlessly making sure that all information is secured and readily available for retrieval at the same time.

Lead Management Systems

Lead Management in every company is very important no matter how small or big the business is. Leads are very beneficial when it comes to marketing and advertising. Let Zeniark do the lead management for you and have a flourishing success in your business.

Attendance Monitoring Systems

Our attendance monitoring system will help you document your people's attendance effectively. With this system, you can keep track of your employees' attendance, punctuality as well as being updated on other information about them that may come handy.
